

Need a temporary bathroom?

Talk to TADWA.

CarePort is an accessible shower or shower / toilet unit that can be set up at home, offering privacy, safety and convenience.

For those dealing with medical or physical conditions, accessing a standard bathroom (often upstairs) can cause a significant amount of distress or even mean that they are unable to stay in their own homes. CarePort is designed to minimise this stress and ensure that people are able to live each day as normally as possible.

The flexible CarePort unit includes curtains for added privacy, grab rails for extra security and a wedge ramp for easier access.

CarePort also offers accessibility for carers so that assistance can be provided without hassle or unnecessary embarrassment.

Equally efficient for people who are renovating their homes, CarePort is a temporary bathroom solution that can be installed in any room, and removed without leaving a trace.
