

## Need a custom bike or trike?

## Talk to TADWA.

Every child deserves the chance to ride a bike. Riding is a fun, low-impact way to get outdoors and stay active. It helps maintain good physical wellbeing and mental health as well as being a great opportunity for socialisation with family and friends.

Each Freedom Wheels bike or tricycle is custom tailored to the rider's height and weight as well as physical and cognitive abilities. Our Occupational Therapists and experienced bicycle technician work with you to specify the appropriate customised supports to give your child with disabilities the confidence and freedom to ride.

The support devices and the braking set-up prescribed by our therapists ensure your child will be safe and comfortable.

To find out more, talk to TADWA. **1300 663 243**

Your child's bike will be custom built using some or all of the following support devices:

- Outriggers to provide stability.
- Pelvic belts, hip and thoracic fins for pelvic and trunk stability.
- Footcups and toe clips to keep your child's feet on the pedals.
- Ankle leg supports to provide lower limb stability.
- Custom handlebars to give your child the best posture and easy steering.
- Hand mitts to grip the handlebar.
- Attendant steering with brakes, so you can control the bicycle from behind if your child lacks the motor skills to steer
