

Need a safer bathroom?

Talk to TADWA.

Slippery bathroom tiles are a leading cause of falls and injury at home.

Full replacement with new tiles rated for slip-resistance is usually recommended, but TADWA is now able to also offer an economical alternative with the **My Shower** treatment service.

The **My Shower** service applies a solution that microscopically modifies the surface of your existing bathroom tiles, making them less slippery in wet conditions.

There is no visible change to the appearance of the tiles and the treatment will last for years if properly maintained.

To find out more, talk to TADWA. **1300 663 243**

Fast to Apply

- Only 2-4 hours needed to treat a standard size bathroom

Fast to Dry

- In most cases the treated area is safe to be walked on immediately.

Long Lasting

- The treatment will last for years if properly maintained.
