

# Considering an emergency alert system?

helping you  
do what's  
important  
to YOU

The 4G Medi Alert Pendant is now available at TADWA.

This convenient device is suitable for you or your loved ones if you are living with dementia, are at risk of falling or just want the peace of mind knowing help is at hand when you need it.

When help is needed, a press of the SOS button on this small and light device will send a text message to your emergency contacts and also rings so they know you need help. This device is not suitable for individuals with a pacemaker.

For more information or to arrange a purchase, contact TADWA on **1300 663 243**.

## Talk to TADWA.

- Automatic fall detection and emergency activation
- Yellow SOS button for emergency alerts
- Automatic hands-free speaker phone
- GPS locator
- Geo Fence boundary features
- Easy, cable-free charging cradle
- No expensive monthly plans

## What is it?

Monitored by your support people, family and friends, the pendant alarm is a device that uses the 4G mobile network to send out SMS help messages and make phone calls to your emergency contacts.

## Situations where a pendant alarm could be useful to you:

- The pendant wearer is under duress
- The pendant wearer has a fall and can't get to a phone
- The pendant wearer is disorientated, lost or at risk

## Features:

- Clear easy to read LCD screen
- Large easy to use buttons
- When the SOS button is pressed the pendant sends an emergency message to up to 8 emergency contacts
- Emergency contacts receive Google Maps link showing the location of the pendant via SMS
- Pendant can receive incoming phone calls from any mobile or landline
- Pendant can be located at any time by emergency contacts via SMS
- Easy to setup using SMS text message commands
- Splash resistant\*
- Falls detection feature
- Includes pendant, USB cable, lanyard, docking station and manual
- Requires pre-paid SIM card (included in TADWA package) - no lock-in contract
- Uses Telstra wholesale network
- No ongoing costs (other than SMS costs)

## Advantages of Unmonitored Pendant Alarms:

- No ongoing monitoring fees
- Product is purchased and owned outright
- Calls go to family, neighbours and/ or friends who are often close by, giving you peace of mind and a sense of security
- Added comfort when you activate the alarm knowing it will call someone you know
- The pendant can be easily programmed to any phone number if required (e.g. if a family member goes on holiday)

## Product Dimensions:

- Length: 65mm
- Width: 48mm
- Depth: 19mm
- Weight: 56 grams  
(just under four 50c pieces)

## Fall Detection:

The device has a fall sensor. If it detects a fall the pendant automatically activates the SOS texts and call list.

Please note: Falls can happen in many different ways and no falls detecting device can be guaranteed to record all falls. If you are conscious after a fall, press and hold the SOS button to summon assistance.

\*The IP rating on the FD model means that the unit is not submersible. It is not recommended to be worn in the shower. We recommend hanging the unit from a hook low enough to reach if a fall occurs while showering or wear the unit with a zip lock bag.
