

Need help with your Home Technology?

Technology has transformed every aspect of our lives. From Facebook, to tablets to the internet, the impact is worldwide. But technology isn't always easy. With different devices, platforms, scammers and security threats, things can get stressful.

This is where we can help.

Our Technology and Computer Support team can take the hassle out of technology. We specialise in helping older people and people with disability learn how to use technology so the ability to connect is at your fingertips.

You'll deal with a home technology expert, not a salesperson. You won't be rushed or given biased advice.

If you are looking to purchase a computer or just need to understand how to set it up and use it in ways that suit you, we can help.

To find out more, talk to one of our friendly team members at TADWA on **1300 663 243**.

Talk to TADWA.
